[illegible]

1

A large grid of empty boxes for handwriting practice. The grid is composed of many small, empty rectangular boxes. Some boxes contain horizontal lines (one or two) to guide the height of letters. The grid is organized into several rows and columns, with some rows having a different number of boxes than others. The boxes are arranged in a way that allows for the practice of individual letters and words.

[illegible]

A diagram of a 2D hexagonal lattice. A central square unit cell is highlighted with a black border. The lattice is composed of hexagons, with the central square unit cell being a subset of the lattice structure.

[illegible]

A diagram of a 7x30 grid representing a 2D lattice. The grid is mostly filled with small squares, but has two missing squares at the top center and top right. The missing squares are located at row 1, column 10 and row 1, column 25. The grid is labeled with 'x' and 'y' axes at the bottom.

The diagram illustrates a sequence of 30 small squares arranged in a grid-like pattern. The squares are organized into rows and columns, with some squares missing, creating a sparse, stepped appearance. The pattern starts with a single square at the top left and expands outwards, with a notable gap in the middle of the sequence.

The diagram illustrates the hierarchical structure of a 1024-point FFT, showing the flow of data through multiple stages of butterfly operations. The structure is organized into four main groups, each labeled on the left: **0 0**, **0 1**, **1 0**, and **1 1**. Each group contains a sequence of stages, with some stages having additional labels like **—** or **—**.

- Group 0 0:** Contains 10 stages. The first stage has 1024 boxes. Subsequent stages have half as many boxes as the previous one. The stages are connected by lines representing butterfly operations.
- Group 0 1:** Contains 10 stages. The first stage has 1024 boxes. Subsequent stages have half as many boxes as the previous one. The stages are connected by lines representing butterfly operations.
- Group 1 0:** Contains 10 stages. The first stage has 1024 boxes. Subsequent stages have half as many boxes as the previous one. The stages are connected by lines representing butterfly operations.
- Group 1 1:** Contains 10 stages. The first stage has 1024 boxes. Subsequent stages have half as many boxes as the previous one. The stages are connected by lines representing butterfly operations.

The diagram shows the flow of data through multiple stages of butterfly operations, with the number of boxes decreasing by half in each subsequent stage. The stages are connected by lines representing butterfly operations. The diagram is organized into four main groups, each with a vertical label on the left: **0 0**, **0 1**, **1 0**, and **1 1**. Each group contains a sequence of stages, with some stages having additional labels like **—** or **—**.

1

Diagram illustrating a sequence of boxes (likely representing data points or elements) arranged in four rows. The first row contains 6 boxes, the second row contains 22 boxes, the third row contains 22 boxes, and the fourth row contains 20 boxes. A horizontal line is drawn below the first three rows, and another horizontal line is drawn below the fourth row.

The diagram shows a grid of boxes arranged in seven rows:

- Row 1: 20 boxes
- Row 2: 18 boxes
- Row 3: 9 boxes
- Row 4: 17 boxes
- Row 5: 15 boxes
- Row 6: 10 boxes
- Row 7: 19 boxes

The diagram consists of a 16x16 grid of squares. The top 12 rows contain various patterns of squares and lines. The bottom 4 rows contain a single square in the 10th column, a single square in the 14th column, a row of 16 squares, and a row of 16 squares with the 10th and 14th squares replaced by double and single quotes respectively.

The diagram consists of 100 small squares arranged in a grid-like pattern, representing a sequence of data points or a timeline. The squares are arranged in 10 rows of 10, with some squares missing, creating a sparse, irregular pattern. The pattern is as follows:

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

The image displays a large grid of small squares, some of which are filled with black, forming a complex pattern. The pattern is composed of several distinct shapes and lines, including a large 'X' shape, a large 'U' shape, and various smaller geometric forms. The squares are arranged in a grid that is 100 columns wide and 100 rows high.

Diagram illustrating the sequence of boxes (1 to 100) and their corresponding values (1 to 100) in the context of the problem. The boxes are arranged in 10 rows of 10. The sequence is as follows:

- Row 1: 1, 2, 3, 4, 5, 6
- Row 2: 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24
- Row 3: 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36
- Row 4: 37, 38, 39, 40
- Row 5: 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64
- Row 6: 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76
- Row 7: 77, 78, 79, 80
- Row 8: 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96
- Row 9: 97, 98, 99, 100

1

A 10x20 grid of squares. The squares are either white or filled with black. The black squares form a complex pattern, including a large 'X' shape, a central black square, and various other scattered squares. The pattern is symmetrical about the vertical center line.

Diagram illustrating a 3x25 grid of squares. The top row has 5 squares on the left and 1 square on the right, with a gap in the middle. The middle and bottom rows are solid. The top row is labeled '1' on the left and '2' on the right. The middle row is labeled '3' on the left and '4' on the right. The bottom row is labeled '5' on the left and '6' on the right.

The diagram illustrates a sequence of 28 rectangular blocks arranged in a grid-like pattern. The blocks are organized into four rows. The first row has 28 blocks. The second row has 4 blocks. The third row has 16 blocks. The fourth row has 4 blocks. The blocks are arranged in a way that suggests a sequence or a process, with some blocks having lines extending from them.

The diagram illustrates a 16-bit ALU architecture. It features a central ALU block with multiple inputs and outputs. The inputs include registers A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z. The outputs include registers A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z. The ALU block is connected to various control signals (C, Z, N, V, O, D, B, S, L, R, M, P, Q, R, S, T, U, V, W, X, Y, Z) and internal logic blocks (adders, multipliers, comparators, etc.). The diagram is highly detailed, showing the internal structure of the ALU and its various components.
